**CLAIMS 158-232 ARE PRESENTED FOR**  
**EXAMINATION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 158-172, 225-230 and 231, drawn to a therapeutic method comprising inhibiting non-aortal vascular smooth muscle cell proliferation associated with procedural vascular trauma;
- II. Claims 173-181, 207-211 and 232 drawn to a therapeutic method for preventing or treating a cardiovascular or vascular indication characterized by a decreased lumen diameter,
- III. Claim 232 Drawn to a method of treating diabetic retinopathy; and
- IV. Claims 212-230 drawn to a therapeutic stint;

Claims 182-206 will be examined if either of the elected Groups is I-IV.

Further restriction may be required.

Inventions of Groups I to III are drawn to separate and distinct methods of treating various medical disorders which have attained a separate status in the pharmaceutical art since they have acquired a separate status in the pharmaceutical art. The diseases to be treated have different etiology and have acquired a separate and distinct status in the pharmaceutical art.

Group IV involves claims drawn to a stint which are classified in class 360 different than that of Groups I-IV since they are classified throughout class 514

A search of the pharmaceutical arts would create an undue burden on the examiner.

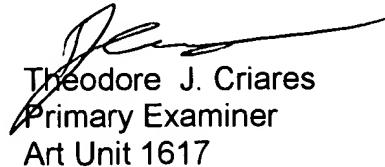

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Page 10 of the claims is missing and a copy thereof is requested.
